Water-soluble NPK fertiliser with micronutrients and amino acids

Grades: Finisher 15-7-30+3MgO+TE+amino,
Finisher 12-6-36+2.5MgO+TE+amino

FINISHER is excellent water-soluble NPK fertiliser with micronutrients, amino acid and high potassium content. Amino acid in the fertiliser promotes easier penetration of essential nutrients, activate the production of phytohormones by the plant, and also increase the resistance of crops to disease and stress factors (drought, water logging, damage caused by diseases and pests, etc.). When applying at late vegetation stages, Finisher contributes to even ripening and better fruit bearing, improves taste, appearance and shelf life of yield, increases sugar content in sugar beet tubers. The product is made from ecologically clean raw materials and contains no sodium, chlorine and heavy metals. The fertiliser quickly dissolves in water. It is intended to use in greenhouses, open field and foliar application. It is recommended for use on all crops.
